

**Mandatory Language for Monitoring/Reporting Violation  
Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)  
MONITORING, ROUTINE (DBP), MAJOR/CHLORINE**

The CITY OF EAGLE LAKE water system PWS ID 0450002 has violated the monitoring/reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This/These violation(s) occurred in the monitoring period(s) Q4/2021  
<monitoring period of violation>

**We are taking the following actions to address this issue:**

The City of Eagle Lake Chief Operator ensures timely submittal of quarterly reports. While this report was completed with levels in TCEQ compliance, it was not received by TCEQ during the reporting period. Additionally, the Public Works Department will provide administrative support to directly mail the reports as required to ensure TCEQ compliance. All completed reports are available for public inspection.  
<corrective actions>

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Henry Diaz at 979-234-2640.
